8th December 2016

New custom designed and built games decks for large yachts available from Superyacht Tenders and Toys

Superyacht Tenders and Toys has added custom designed and built games decks to the range of products that it can offer, building on the growing trend for outdoor games space. The games decks, which are often on the bow or on helipads, can be used for playing basketball, football, tennis and volleyball; making great use of deck space that has been freed up by flush anchor systems and clear decks.

Superyacht Tenders and Toys are offering the custom design and build of these cutting edge sports decks. Made entirely from carbon (including football goals etc.), they are light and manageable as well as quick and easy to assemble. They can be custom-made to any shape and size to create a bespoke, personal sports court.

The games decks are typically made of carbon poles 3m in length and spaced every few metres. Corner posts and side poles are inserted into the deck fittings. Dyneema side nets are connected to the corner poles and tensioned using Spinlock jammers attached to the corner poles. For additional stability, Harken fiddles are attached to the corner poles and tensioned. All poles are produced in pre-preg carbon fibre.

Additional unique features include specially made storage bags, which are easily stackable. The structure is rated and approved for up to 30 knots of

wind plus a 3-person impact. All games decks are fitted by the SYTT team and the crew trained on handover.

Mark Peak, Yacht Toy Specialist, Superyacht Tenders and Toys comments, “When surrounded by stunning views and brilliant sunshine, working out on deck in the open air has a lot going for it, which explains the growing popularity of these games decks.”
